## REACH STATEMENT

Graphic PLC's printed circuit boards are classed as articles and do not contain any substances that require registration under UK or EU REACH legislation.

Q1499 Graphic Material Safety Data Sheet provides information and guidance for safe use and disposal of Graphic PLC's printed circuit boards. It is available on request.

Boards not finished with tin/lead solder contain none of the 223 substances on the Candidate List of Substances of Very High Concern (updated January 2022) above the concentration limit of 0.1% by weight. A statement to this effect appears on all quotations and certificates of conformity leaving Graphic.

A handwritten signature in black ink, appearing to read 'T Allen', is positioned above the printed name.
